What is an "alterative"? A medicine that alters or changes unhealthy action to healthy action. Ayer's Sarsaparilla does all this without stimulation. FISHER READY

Continued from Page One. Chicago convention in June. Those who know the terrible stress the administra-tion has been under during the last two or three weeks can appreciate how the nomination or Governor Freat for another term might be held up for a while till the situation became less tense. The President's prospects for a renomination are now better and this fact may or may not hasten the Governor's reappointment. Opinion here notwithstanding some statements to the contrary, is that Governor Frear will not be given a new commission till af ter the selection of Hawaii's six dele

gates for Taft has been made certain. The Delegate will be in Honolain quite as soon as this letter, according to plans he had when he left here the other day. He expected to sail on the Lurline, and, after a short stay in Ho nolulu, to return to Washington for the remainder of the session. He made no concealment of his purpose to fight the Gavernor as hard as he could, but was less demenstrative as to his plans about a Taft delegation from Hawaii.

> WASHINGTON, January 25.—It looks very much as though the case of Governor Frear had become involved in the administration's scramble for Delegates. There have been so many conflicting statements, one nardly knows what to believe. Over at the of-

> Secretary Hilles denied it. Secretary Fisher's secretary denied it, but finally, after President Taft had returned from his New York trip and was available for a direct question, he stated it was true and that he planned to send a "special commissioner" to the islands to look into those charges. Finally Secretary Fisher also returned to town and he acknowledged that "a special commissioner" it was likely to be, but he did not know just when this specical commissioner would be appointed. In fact he (Fisher) might himself be the special commissioner, but if so he could not think of going to the Islands till May or June and, perhaps, not as early

In the absence of the big chiefs, it will be seen that much of the information came from the ante-rooms, all of which goes to show that private secre-taries, like other folks in this world, may be mistaken. Private Secretary George R. Gove was very certain that sence of Secretary Fisher himself.

Kuhio "Demanded"

The long and the short of it is that the Prince, like a lot of mainland politi-cians, is making the most of the President's necessity for delegates to Chicago convention. He demanded (not requested) the investigation of the charges against Governor Frear by some special man and it looks as though, under all the circumstances, that had President Taft did not dare deny him. contemplating a trip to Honolulu forthwith to participate in the proceedings for the election of delegates and to prevent the passage of resolutions in the convention endorsing the Government. convention endorsing the Governor for another term. As already cabled to The Advertiser, the Delegate was unable to obtain passage on an American steamer from San Francisco to Henolulu for several days and he has not made known vet what his final decision about taking the journey will be.

Appointment Must Wait.

Any how, whether the Prince undertakes the journey or not and what ever be the reply of Governor Frear to the Delegate's charges, it need be no surprise if the renomination is held no for quite a while yet—at least until

haps not till after the Chicago conven-tion has met. Secretary Fisher's program may be something of a factor, unters while he is absent on the wing. After being in Washington for a few hours, after an absence of quite two weeks, he is hurried away to Missouri to bolster up the Taft cause in his home State. Soon after he gets back here it is planned that he shall start for Panama on a trip which the President wants him to take. But it is also talked that the President may decide to and that the Freedom may use of the nominate Mr. Nagel as Justice of the Supreme Court. DROUGHT CAUSES A LITTLE WORRY

Amid the many cheering reports of plantation prosperity there is a slight note of gloom over the weather conditions, the long continued dry spell, especially on Hawaii, being some cause was arrested on suspicion, but with no of worry. The dryness of the season knowledge that he was a participant in threatens to break all records, and if the Delmonico affair the night before. It keeps up will soon begin to injure it keeps up will soon begin to injure crops. Not for many seasons have Hilo and Hamakua districts had such a dry spell. Ordinarily there is too much rain rather than too little, in these districts, and a dry spell is welcomed, but there has been quite enough of it now. The stage has been reached where damage is threatened.

On Oahu also there is much need of rain. Yesterday's rains in Honohulu were mere southerly showers, and reports from plantations up the line are to the effect that they want a good rain. Continuation of the dry conditions on this island, as on Hawaii, will soon begin to hurt crops.
